SEED HER POWER

On-the-Go Millet Crackers & Functional Dips for Cycle-Synced Nutrition

The Problem

- Menstrual phases cause hormonal changes, causing nutrient deficiencies and low-energy

- Busy women lack convenient ways to accurately incorporate these nutrients into their diets except through a series of vitamins

Seed Cycling

"Seed cycling is a nonpharmacological intervention in which a combination of pumpkin and flaxseeds, sesame, and sunflower seeds are given to female patients at different menstrual cycle phases."
